Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Specification

1. The disclosure is objected to because of the following informalities: On page 1, line 1 of the specification, the continuation data should be provided. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6, 8-15, 17 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Ogawa et al. (5,398,554) (hereinafter Ogawa).

Ogawa teaches a Coriolis flow meter comprising at least one flow conduit (35), a drive system (36) coupled to the flow conduit and a balance system (39) coupled to the flow conduit, wherein the balance system is sized and located such that the momentum of the balance system is equal and opposite to the momentum of the drive system (col. 5, lines 30-57). The balance system is coupled to the conduit using leaf spring (60). As to the leaf spring stiffness and the balance mass causing the natural frequency of the balance system to be less than the drive frequency of the flow meter would be an inherent characteristic since such would be a requirement in order to acquire proper measurement results.

Allowable Subject Matter

4. Claims 7 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. The following is a statement of reasons for the indication of allowable subject matter:
The prior arts made available do not teach or fairly suggest, alone or in combination, a balance system for a Coriolis flow meter having an orientation substantially forty-five degrees to a plane of the flow conduit.
